Dear Sir,

I am pleased to be applying for the Digital Technical Specialist position. My extensive experience with designing and developing websites and web apps using JavaScript and JS frameworks Front End and Node.js or PHP Back End technology matches well with your requirements. In addition, my background with working in large development teams online has given me the skills to adjust to the changing dynamics and processes of those environments while meeting scheduled milestones and deliverables.

In my previous experience on online Global Job portal sites such as Upwork, I developed several web-based applications for a project management software client. I was involved in the design and development process for all applications, and I managed enhancement requests after each rollout.

I am a proven team player, which is another important requirement for this position. I've rich experience in teamwork for exhibiting ideal teamwork traits, including reliability, good communication, commitment, adaptability, and going above and beyond what is asked. Management also recognized my accomplishments in meeting project deliverable deadlines over 99% of the time, exceeding expectations by 5%.

Thank you for taking the time to review my credentials and accomplishments. I am very passionate about being a competent and contributing team player, and I hope to have the opportunity to discuss my examples in greater detail with you. I look forward to learning more about this position and your development teams.

Sincerely,

Wang Ming
